# Trimming Solution in Mailroom

Behind Goss Metroliner, up to 96p tabloid

**RIMA  SYSTEM**

## Trimming Solution in Mailroom

### Web Press

Goss Metroliner, 16 pages, 3 webs

### Product Mix

Up to 96 pages tabloid (glued or stitched), up to 64.000 rph

### Post Press Configuration

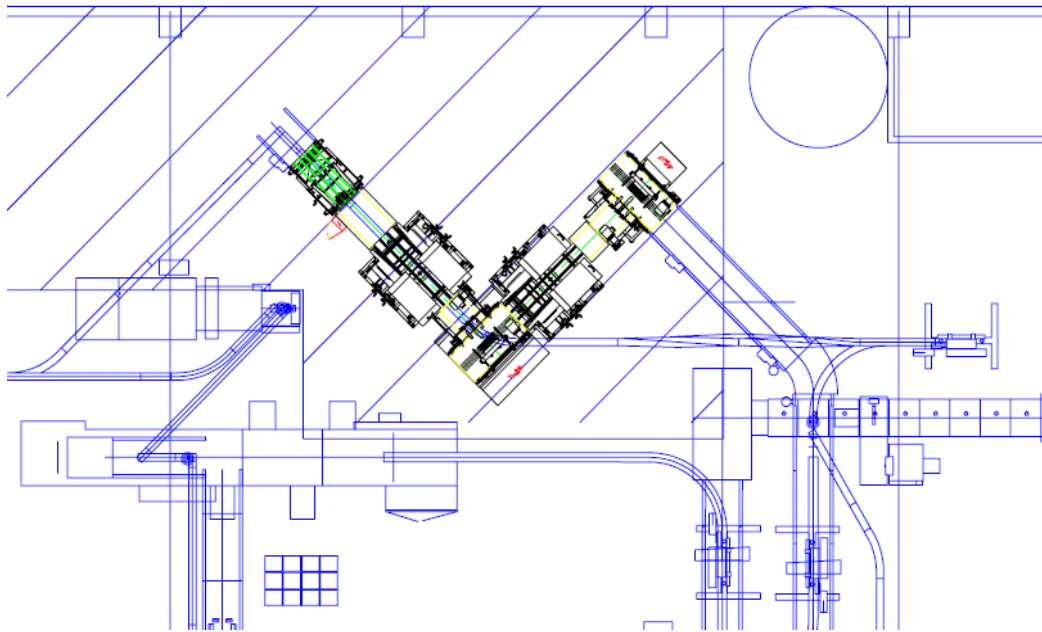

A gripper system takes up the shingled stream from the folder deliveries and transports the copies to a second floor where an RS 830 rotary trimming line is located. The RS 830 „all-in-one“ trimming line is equipped with long stream aligners, zero backlash adjustment and integrated knife-cooling and guarantees a perfect trim of tabloid productions of up to 144p. The machine can be easily and quickly set up with handwheels from each side of the machine. The knives have a very long lifetime and can be resharpened 10-12 times for up to 800 million copies! A trimming lower knife and special non-marking belts increase the product quality in coldset applications even further.

### Responsible Project Center

RIMA-SYSTEM Europe, Düsseldorf

## Layout

## Trimming Solution in Mailroom

A gripper system transports productions which have to be trimmed to the second floor of the mailroom. An RS 830 „all-in-one“ trimming line guarantees a perfect precise trim with features like hexbrator technology, zero backlash adjustment and integrated knife cooling. The special non-marking belts and the trimming lower knife which are available for the RS 800 rotary trimmers increase product quality in coldset applications even further. After three-side trimming the products are transported back to the ground floor for further processing.
