Notes on spare parts orders / shipments

Please send all your spare parts orders via email, fax or via our webpage so we have them in written form.

Please specify part number & name, quantity and let us know for what machine (including serial number!) you need the parts.

All spare parts orders / inquiries are normally processed within 24 hours.

If we have a formal order before noon we normally proceed with standard shipping the same day in case all parts are available.

If you need partial shipments or express shipments please clearly specify this in your parts order (extra costs involved).

Important: Some countries have special customs clearing rules. Please exactly specify all needed documents and procedures in order to avoid problems and delays in customs !

If no special procedures are specified we assume that standard shipping will be o.k.
